Forecast for Sunday 08 May 2022

Weather: A dry and mostly cloudy start with extensive low cloud covering hills, especially in the east of the range. Cloud quickly lifting and breaking through the morning to leave a dry and warm afternoon with increasingly prolonged sunshine. Fine, mostly clear during the evening. Light winds throughout.

Chance of cloud-free hill tops above 600m: 20% in the east, 40% in the west at first, increasing to greater than 95% by mid-late morning.

Low cloud and visibility: Widespread cloud in the east of the range to around 400-500m initially, with some patches to 300m. Cloud more broken in the west. Cloud lifting above summits by mid-late morning. Outside of any cloud very good or excellent visibility is expected.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

With moderate to high UV levels and temperatures in the high teens, possibly low twenties Celsius at low levels, the main hazards will be sunburn, sunstroke and dehydration. Ensure you are prepared for the warm, dry and sunny conditions. Also be aware that UV levels increase with height – sun protection is a must.

Recent rainfall: measured at Neuadd: altitude 353m
